

**Reduction Sleeve and Cap**

- Optional reduction sleeve and Cap allow a variety of collet types to be used in same chuck body.
- Precision manufactured and matched to chuck body to guarantee accuracy.
- Standard models are Q-RSC6042 and RSC6042 allowing DIN 42 Collets to be used in 60mm Chucks.
- Alternate reduction options are available to order.

Standard and Custom Collet Chuck Adaptors

- Chuck Adaptors available to all spindle mount types.
- Extra Wide Chuck Adaptors allow small chucks to be assembled to large Spindles.
- QCRL Chuck Range allow back body to be interchanged for different spindle mounts.

Drawtube Connectors and Ejectors

- Drawtube Connectors are precision machined to allow collet chucks to be connected to a wide range of lathe types.
- All Chucks include blank connector as standard.
- Custom Part Ejector Ejectors and Fixed Length Stops are available to order.

Bar Seals

- Reduces coolant and chip ingress into chuck / collet.
- Bar Seal should be prepared to suit bar stock diameter.
- Compatible with QCRL Range only. Bar Seal and Retaining Cap supplied as standard with QCRL Chuck Range.
